Bodyflow® is a clinically proven world-first electrotherapy device specifically targeting smooth muscle found within Arteries, Veins and Lymphatics which enhances fluid drainage and increases blood flow.

The patented Bodyflow® devices are manufactured in Germany with the global distribution being owned by privately owned Australian company, Bodyflow® International Pty Ltd.

The scope of stimulation of smooth muscle has stemmed out to other research areas such as management of Lymphoedema and the Anti-thrombotic properties of Bodyflow®. With three clinical studies to scientifically back this technology, Bodyflow® is aiming to become one of the world's preferred methods of management of Lymphoedema.
